AGVERTISER

FEBRUARY 2020

CASE IH
AGRICULTURE

INSIDE THIS ISSUE:

- Summer Guidance equipment sale
- Introducing RTK Lite
- Pre-Order your Case IH hay equipment now!

from the manager's desk

Hi all and welcome to yet another edition of our Rocky River AGvertiser!

I hope you have all had an enjoyable holiday break with friends and family and that you are all raring to go for 2020! Hopefully 2020 is much kinder than 2019 was and that we actually receive decent rains throughout the growing season.

It is our intention to run an on-farm seeding demonstration program again this year depending on the interest shown by our customers, so should you wish to be involved please contact our Sales Department to register your interest.

This year we will once again be holding our bi-annual Trade Night which will be held on the night of Wednesday 17 June. Further details to come closer to the date! Please mark this date on your calendars as we want to keep the trade night a great night for you all!

It is probably an appropriate time for me to divulge to you my intentions post Rocky River Ag. I will be retiring from my role here at the 30 June this year with Lynton Smart taking on the

Business Manager/Dealer Principal role, which has been in the planning stages over the last few years. I am certain Lynton will do very well in his new role here at Rocky River Ag and I most certainly wish him much success for the future and I trust that your support will continue when he takes over.

Whilst my intention is to take a short break in the near future it is not my intention to stop working completely. From previous discussion with our Director Mathew East it was decided that should another role become available within the East Farm Machinery Group that was suitable and closer to Adelaide where my family resides (including my first Grandchild!) and that I would continue on within the group. Mat has kindly offered to me the role as Business Manager for G&J East Strathalbyn, with the distinct purpose of training the next Dealer Principal for the East Farm Machinery Group. This will be another challenge in my life but it is a challenge that I am most definitely looking forward to and who knows I may get to sell a 3PL grade blade or two... Won't that be exciting!

Grab a cup of coffee or a cold beer, sit back and enjoy reading the rest of this edition of the AGvertiser and I take this opportunity to wish you all a successful year ahead.

Regards,

Rob Dingle

Front cover picture: From the archives 1997, RRAS sold approximately 20 brand new headers!

Harry the Harvest Van

Ben Osborn – Iveco Representative (second from Left) officially handed over the van to RRAS staff Lynton Smart, Rob Dingle and Nick Pole.

Harvest 2019 saw Rocky River Ag trial something new, we ran a Harvest Parts Van for 7 weeks from late October till Mid December. The Iveco van was given the nickname of "Harry" was kindly lent to us by Case IH. The Iveco van was loaded with a large range of fast moving harvest parts and other miscellaneous products from our store.

Harry visited many towns throughout the region including Snowtown, Lochiel, Brinkworth and up as far as Wilmington and Booleroo Centre, this was done over a four day period with Malcolm Hill behind the wheel.

Customers were encouraged to pre order parts and have them delivered by "Harry", this part of the service was well received and utilised by the customers,

particularly those in the outer areas of our region often saving them a long return trip to Crystal Brook. We feel that this service added to the already strong Customer first philosophy here at Rocky River Ag and we are looking at ways to continue with something similar for 2020.

We value feedback from our customer base, so any feedback or suggestions on this service are encouraged and welcome!

A big thank you to Iveco and Case IH for allowing us the opportunity to trial the Harvest Van and a huge thank you to our Case IH Aftersales Rep Scott Jericho for his valuable assistance on getting the van ready for the road!

Grainline Side Shift Augers 10 inch x 7 foot

Grainline have developed a unique horizontal auger system that can be used in conjunction with the Grainline Rota Door. This auger mounts to the trailer tail gate and flange mounts over the bagging door. With a direct drive from a hydraulic motor plumbed into your truck hydraulics, this auger transfers the grain beyond the side of your truck where it can load directly into another auger or hopper.

Come into store and see the Grainline Side Shift Auger Display!

???

Come into store, purchase one of our mystery boxes and you are guaranteed to get yourself a bargain!

Some of the items include Kincrome equipment, electrical accessories plus much much more!

GRAB YOURSELF A BARGAIN!

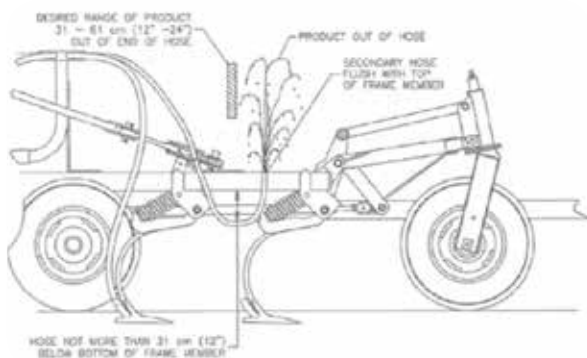

update from the workshop

Happy New Year!

Harvest was quieter than normal but we are still taking bookings for pre-season services for your header and front, give myself or Evan a call to book your machine in.

With seeding just around the corner here are a couple things to check on your Flexi-Coil air seeder to make sure its running in tip top condition! To check the air pressure have the machine in the ground with one hose removed (furthest trip out) this hose needs to be tied to the bar pointing up, run the machine at sowing speed, it should have material (as per diagram) approx. 12-24 inches shooting out of this hose.

Do this for both seed and fertiliser hoses if a double shooting machine. This may also require the air dampers on the side of the bin to be adjusted to suit air flow and or fan speed adjustment. (Please refer to operators manual for further information.)

If running an air kit with stand pipes/riser approx. 4ft high (eg. Simplicity or Raycol) remove the top cap and run the fan to have material approx. 2-4 metres shooting out of the top of the stand pipe. If too high reduce fan speed and if too low then increase fan speed. Please note: excessive blower pressure will cause premature hose wear and seed bounce. Inadequate blower pressure will cause material to stall in the lines causing a blockage.

If you would like to have a pre-season check over of your seeding equipment or tractor book in now to make sure your machines are ready for when the season breaks!

OAT coolant (Organic Additive Technology) has been around for some time now, if you are unsure what coolant is to be used in your machine please contact us or the parts department for assistance. Machines built after approx. mid 2014 have OAT coolant but if unsure please check with us first.

A note to all our West Coast Flexi-Coil customers, your first point of contact for Service and parts for your Flexi-Coil machinery is Bascombe Auto Ag (phone: 86762980) give them a call they will be happy to assist you with any Flexi-Coil issues.

A reminder that all AFS/GPS issues please call our main line 86362772! Or alternatively contact the Case IH support line on 1800 071 018 (during business hours) or email them: afssupportanz@caseih.com Wishing you all a successful, trouble free seeding!

meatball subs... yum!

The perfect 15 minute weeknight dinner!

Ingredients

- Packet of pre-made mini meatballs
- 400g tin of diced tomatoes
- Jumbo hot dog rolls
- Baby rocket
- Mozzarella cheese

Method

Cook the meatballs in a fry pan until almost cooked, then added the tin of diced tomatoes. Let tomatoes and meatballs simmer for about 5 minutes. Cut and butter hot dog rolls and add the baby rocket. Add about 4-5 mini meatballs to each sub and top with cheese. Enjoy!
